

# Glenfield Intermediate School

## Considerations Before Purchasing a Device

### **Glenfield Intermediate uses Google Apps for Education.**

This means that we use a Google Apps environment for teaching and learning. Take note, Microsoft Office is not required on devices as Google Apps provides the students with an equivalent free environment available using the Internet.

<b>Price:</b>	How much do you want to spend? What is your budget?
<b>Battery Life</b>	Should last at least 4 hours to be able to get through a school day without recharging.
<b>Weight</b>	Is it heavy? Will your child be carrying this to and from school every day?
<b>Wireless</b>	Should be wireless compatible.
<b>Screen Size</b>	Minimum 10 inches
<b>Internet Browser</b>	The Google Chrome browser is necessary for our systems. Make sure the device can run this.
<b>RAM</b>	Minimum 2GB, but recommend 4GB or more for Laptops /Netbooks, or else programmes may be much slower to run, 16GB or more recommended for Tablet devices.
<b>Protection</b>	Does your device have a suitable case to protect it ?
<b>Insurance</b>	While we take care to protect students' property, we cannot accept responsibility for devices lost or stolen, so make sure it is covered for these possibilities. Accidental damage insurance may also be available if desired.
<b>Warranty</b>	Minimum warranty is 1 year, but you may want to consider upgrading this to a 2 or 3 year warranty.
<b>Anti-virus Software</b>	For Windows or Mac OSX devices anti-virus and anti-spyware software is essential to protect the data on the device, and prevent the device being used to spread this malware to other devices at home or at school.
<b>Extras</b>	Headsets or ear phones are required. A Bluetooth keyboard is useful for tablets.

### **A VERY IMPORTANT CONSIDERATION**

**High Schools:** Check the BYOD requirements for local High schools that your child may attend.
